

Who Uses: Exactor™ High Energy (601008)

Performance horse trainers who require high fat, high carbohydrate and high fibre levels for horses in training and physically demanding roles.

Description

This high energy, textured ration in the Exactor line is intended for young race horses in training, fillies prone to tying-up and sport horses in competition. This feed offers concentrated energy and protein to assist in sustaining performance and power while young horses are still growing to maturity. Feed along with hay.

Features

- Corn is included.
- Contains added fat from vegetable oil.
- Contains shredded beet pulp.
- Contains yeast culture.
- Contains high level of Vitamin E.
- Contains chelated trace minerals.
- Formulated to 12.5% crude protein.

Benefits

- Raises the total energy concentration, by elevating the starch carbohydrate portion, to support growth and performance.
- In cold weather training, higher energy is required for increased maintenance levels.
- Increases energy density to elevate calorie intake, for the same amount of ration. Supports increased muscle glycogen content, over time (10-12 weeks).
- Adds increased energy, fibre bulk and digestible calcium to support intense physical activity encouraging adequate growth to maturity.
- A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.
- For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.
- Advanced nutrition to balance hay offered to young, genetically superior performance horses and young horses in training and still growing.

Any switch to a high fat ration should be made gradually over a 15 day period. For the first 5 days, replace $\frac{1}{4}$ of the existing grain ration with Exactor High Energy. Then replace $\frac{1}{2}$ the grain ration with Exactor High Energy for the next 5 days. On day 11, offer $\frac{3}{4}$ Exactor High Energy and $\frac{1}{4}$ of the former ration. On day 16, feed all Exactor High Energy. Hay should also be available. Make the change to Exactor High Energy first, then alter quantity to support condition. Water and salt should be available, free choice, at all times.

EXACTOR HI ENERGY HORSE FEED

M-601008

THIS FEED CONTAINS ADDED SELENIUM AT 0.300 MG/KG.
A LIST OF THE INGREDIENTS USED IN THIS FEED MAY BE OBTAINED
FROM THE MANUFACTURER OR REGISTRANT.

GUARANTEED ANALYSIS:

CRUDE PROTEIN (MIN. %)	12.50	VITAMIN A (MIN. IU/KG)	9,000	
CRUDE FAT (MIN. %)		5.00	VITAMIN D (MIN. IU/KG)	2,200
CRUDE FIBRE (MAX. %)	11.00	VITAMIN E (MIN. IU/KG)	220	
SALT (ACT. %)	0.75	CALCIUM (ACT. %)	0.75	
SODIUM (ACT. %)	0.30	PHOSPHORUS (ACT. %)	0.60	
COPPER (ACT. MG/KG)	40	ZINC (ACT. MG/KG)	80	

DIRECTIONS FOR USE: FOR THE MATURE WORKING HORSE: FEEDING MASTERFEEDS EXACTOR HI ENERGY HORSE FEED AS A SOLE RATION AT 1 1/2 KG PER 100 KG BODY WEIGHT PER DAY WILL MAINTAIN A HORSE IN GOOD CONDITION UNDER LIGHT EXERCISE.
THE WORKING AND GROWING HORSE WILL REQUIRE MORE FEED, UP TO 1 3/4 TO 2 KG PER 100 KG BODYWEIGHT PER DAY.

CAUTIONS:

1. DIRECTION FOR USE MUST BE CAREFULLY FOLLOWED.
2. FEED IS PERISHABLE. STORE IN DRY AREA FREE FROM INSECTS.
3. DO NOT FEED MOLDY OR CONTAMINATED FEED AS IT CAN CAUSE ILLNESS OR DEATH.
4. USE SHAVINGS OR OTHER LOW DUST MATERIAL FOR BEDDING.
5. PROVIDE CLEAN FRESH WATER AT ALL TIMES.
