Performance Features

MetaBalance formulation provides the proper balance of amino acids and metabolizable energy to optimize reproductive performance and body condition.

High calcium and phosphorous levels to increase bone strength and assure long term reproductive efficiency.

L-Carnitine has been added to all *MetaBalance* complete sow rations. L- Carnitine increases litter size and improves litter birth and weaning weights.

Yucca extract to aid in the reduction of ammonia for an improved barn environment and healthier pigs.

Impoved vitamin and mineral levels.

Organic selenium results in stronger piglets due to improved selenium status and improved immune response.

Vitamin E increases litter size and maintains sow immunity.

Folic Acid is necessary for optimum reproductive performance.

Biotin affects reproductive performance by improving conception rate, increasing litter size and reducing wean to estrus interval. Also maintains foot, skin and hair condition.

METABALANCE complete sow rations available to you:

Gestation:

MetaBalance SGF 2

Lactation:

MetaBalance SL 4
MetaBalance SL 4.5
MetaBalance SL 5.0
MetaBalance SL 5.5
MetaBalance SL 6.0
