"The right feeds really help my horse perform to the best of his ability."

EQ 16 (TEXTURED)

FOR YEARLINGS,
FOR PREGNANT
& LACTATING MARES

Masterfeeds EQ16 (textured) is a high quality, high calorie traditional broodmare, foal and yearling ration. Premium grains, blended with a protein, mineral and vitamin pellet and molasses make for an appealing sweet feed for fussy eaters, and for those owners who prefer to feed a traditional grain based textured ration.

FEEDING DIRECTIONS:*

Nursing Foals: Feed ¼ to 1 kg of EQ16 per 100 kg body weight, according to the mare's milk production and the foal's development.

Weanlings: Feed 1 to 1½ kg of EQ16 per 100 kg body weight along with good quality grassy mixed forage. Feed according to development and the quality of hay or grass.

Yearlings: Feed ½ to 1½ kg of EQ16 per 100 kg body weight along with good quality grassy mixed forage. Feed according to development and the quality of hay or grass.

Genetic differences, management and owners goals for growth will alter the amount that should be fed. Closely monitor the foal's development and adjust accordingly.

Pregnant Mares: Feed ½ to 1 kg of EQ16 per 100 kg of body weight along with good quality grassy mixed hay according to body condition and quality of hay or grass. For "Easy Keeping" mares, that need less concentrates than this amount, supplement with VTM Supplement. For more information see VTM Supplement insert.

Lactating Mares: Feed ½ to 1½ kg of EQ16 per 100 kg of body weight along with good quality mixed hay according to body condition and quality of hay or grass.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Highly palatable. Formulated feed made with high quality protein sources and select grains.

Added vegetable oil. To help meet energy requirements for body condition and milk production without overfeeding grain, and to help enhance coat condition.

Contains 100% organic trace minerals. More bio-available resulting in higher uptake of trace elements which are essential for the development of strong healthy joints and an active immune system.

Contains Yea-Sacc® 1026. Alltech's signature product for gut health, the most frequently studied yeast product world-wide; stabilizes gut health, leading to enhanced digestibility and utilization of nutrients.

PHASE 1
OF THE
MASTER CARE LIFE PLAN PROGRAM

Happy horse. Happy life.™

MasterCare
LIFE PLAN

LIFETIME
NUTRITION
PROGRAM

EQUINE DEVELOPER

PELLET / FOR YEARLINGS / FOR PREGNANT & LACTATING MARES

Masterfeeds Master Care Life Plan is nutritional care for the life of your horse. The Plan is divided into five life phases. Each life phase is paired with a proven, quality feed that delivers the nutritional requirements for the development and performance you want to achieve in the specific phase of life of your horse – simplifying the choice, for your peace of mind.

Masterfeeds Equine Developer (pellet) is an excellent feed for broodmares, growing yearlings and two year olds. Well balanced protein, amino acids and energy levels, along with controlled starch content and premium mineral vitamin fortification, encourage balanced growth. The formulation is made to help reduce incidence of developmental problems. It is also an excellent choice for pregnant and lactating mares. The controlled starch content provides a safer choice for the mare, reducing risk for digestive upsets.

FEEDING DIRECTIONS:*

Pregnant Mares: Feed ½ to 1 kg of Developer per 100 kg of body weight along with good quality grassy mixed hay according to body condition and quality of hay or grass. For “Easy Keeping” mares, that need less concentrates than this amount, supplement with VTM Supplement.

Lactating Mares: Feed ½ to 1½ kg of Developer per 100 kg of body weight along with good quality mixed hay according to body condition and quality of hay or grass.

Yearlings: Feed ½ to 1½ kg of Developer per 100 kg body weight along with good quality grassy mixed forage. Feed according to development and the quality of hay or grass.

Two Year Olds: Feed ½ to 1 kg of Developer per 100 kg of body weight along with good quality grassy mixed forage. Feed according to development and the quality of hay or grass.

Most breeders switch to a good quality performance feed after the horse is two years old, but Developer can be fed to older horses if more development is desired.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Highly palatable. Formulated feed made with high quality protein sources and select grains.

Added vegetable oil. To help meet energy requirements for body condition and milk production without overfeeding grain, and to help enhance coat condition.

Contains Sel-Plex®. A non-toxic natural form of Selenium yeast that is critical in a healthy immune system, an effective antioxidant, and is proven to enhance reproductive function in horses.

Alfalfa meal. Provides a highly digestible fibre, and a quality protein source.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial “bugs” to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Contains 100% organic trace minerals.

More bio-available resulting in higher uptake of trace elements which are essential for the development of strong healthy joints and an active immune system.

Masterfeeds Equine Nutrition

PHASE 2
OF THE
MASTER CARE LIFE PLAN PROGRAM

 Happy horse. Happy life.™

SURMOUNT

PELLET / FOR ALL TYPES OF EQUINE ATHLETES

Masterfeeds Master Care Life Plan is nutritional care for the life of your horse. The Plan is divided into five life phases. Each life phase is paired with a proven, quality feed that delivers the nutritional requirements for the development and performance you want to achieve in the specific phase of life of your horse – simplifying the choice, for your peace of mind.

Masterfeeds Surmount (pellet) is our gold standard for fat and fibre nutrition for your horse. This premium ration is relatively high in calories, very palatable, and an excellent choice for those owners and trainers looking for a premium fat and fibre ration that is well fortified with vitamins and minerals. The controlled starch content provides a relaxed working energy for the horse, making it a great choice for hunter trainers, western pleasure trainers, amateur dressage and any other discipline looking for a quality feed without making horses “hot”.

PERFORMANCE

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay.

* Feeding rates may vary depending on forage quality and horse’s activity level.

Contains 100% organic trace minerals.

More bio-available resulting in higher uptake of trace elements which are essential for the development of strong healthy joints and an active immune system.

FEATURES & BENEFITS:

High level of fat and fibre. Provides cool form of calories.

Elevated fat levels from addition of vegetable oil. Increases endurance energy for peak performance.

Increased fibre level. Makes a safe feed that promotes good digestive health.

Contains Yea-Sacc® 1026 and Pulse 500™. Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial “bugs” to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Flexibility/versatility. One feed offers simple practices for many feeding challenges.

Contains high levels of Vitamin E. A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

PHASE 3
OF THE
MASTER CARE LIFE PLAN PROGRAM

Happy horse. Happy life.™

PODIUM

PELLET / FOR ALL TYPES OF EQUINE ATHLETES

Masterfeeds Podium (pellet) is a favourite with owners and trainers looking for a very low starch feed for high performance athletes. With proven results in reducing ulcer incidence and tying up, it is a great choice for standardbred racehorses, eventers, and any trainers and riders looking for an ultra low starch ration for working athletes. Added flax provides an excellent source of Omega-3 and it is fortified with our premium vitamin mineral pack for a complete and balanced feed.

Masterfeeds Master Care Life Plan is nutritional care for the life of your horse. The Plan is divided into five life phases. Each life phase is paired with a proven, quality feed that delivers the nutritional requirements for the development and performance you want to achieve in the specific phase of life of your horse – simplifying the choice, for your peace of mind.

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

High level of Fat and Fibre. High fibre level improves digestive health and provides fibre calories, the most natural form of energy for the horse.

Elevated fat levels with addition of vegetable oil. Increases endurance energy for peak performance; Provides cool form of calories.

Contains 100% organic trace minerals. More bio-available resulting in higher uptake of trace elements which are essential for the development of strong healthy joints and an active immune system.

Reduced level of starch and sugar. A reduced starch and sugar (NSC) diet provides cool energy, and is beneficial for those with sensitive digestive tracts.

Flexibility/versatility. One feed offers simple practices for many feeding challenges.

Contains high levels of Vitamin E. A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

Added B-vitamins. Boosts vitamin intake for horses in high stress or high activity situations when requirements are elevated.

Contains Yea-Sacc® 1026 and Pulse 500™. Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial “bugs” to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

FUSION (CUBE)

FOR ALL TYPES OF
EQUINE ATHLETES

PERFORMANCE

Masterfeeds Fusion (cube) combines fat, fibre and a high level of calories in a very palatable complete feed cube. Added flax provides an excellent source of Omega-3. It's a great choice for owners and trainers looking for a controlled starch premium ration in cube form. Fortified with our premium vitamin mineral pack, Fusion is a complete and balanced feed.

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Cube shape. Encourages chewing which aids in digestion.

7% Crude Fat from all vegetable sources. A source of calories needed for weight gain and performance.

Contains Flax. Excellent source of Omega-3 that enhances overall health and condition.

Reduced level of starches and sugars. Provides "cool" calories, resulting in a calming effect.

Very high in digestible Crude Fibre. These fibre calories are the most natural form of energy for the horse.

Contains 100% organic trace minerals. More bio-available resulting in higher uptake of trace elements which are essential for the development of strong healthy joints and an active immune system.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

MASTERFEEDS NRG

FOR HORSES IN HIGH IMPACT AND PHYSICALLY DEMANDING ROLES

Masterfeeds NRG is loaded with calories and good working energy. This multi-particle ration is based on an oil coated fortified pellet and extruded bits, with a light coating of molasses. The fibre content is medium with some starch and a very high fat content. The 12% fat from all vegetable sources provides endurance energy, and is ideal for maintaining weight. NRG is completely balanced with vitamins and 100% organic trace minerals sources, and can be fed alone with hay. It is also often used as a high fat top-dress.

Solutions from 

NRG (MULTI-PARTICLE)

FOR HORSES IN HIGH IMPACT & PHYSICALLY DEMANDING ROLES

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay.

** Feeding rates may vary depending on forage quality and horse's activity level.*

FEATURES & BENEFITS:

Multi-particle texture

Palatable and easy to digest ration including pellets and extruded bits with an oil and molasses coating.

Very high level of calories and energy

Blended energy from multiple components for improved performance. Meets or exceeds the energy demands of hardworking performance horses.

Contains 12% Fat from all vegetable sources

An easily digestible energy source to compliment the starch and fibre to provide a balanced source of calories.

Contains high levels of Vitamin E

A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

Contains 100% organic trace minerals

For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains Yea-Sacc® 1026 and Pulse 500™

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Contains high crude fat extruded bit

Enhanced energy availability.

Added B-vitamins

Boosts vitamin intake for horses in high stress or high activity situations when requirements are elevated.

Masterfeeds has a long and successful history of delivering quality equine nutrition products and services to horse owners, backed by a national network of resources you can depend on.

PERFORMANCE HORSE NUTRITION NEEDS ARE VERY SPECIFIC. SPEAK WITH YOUR MASTERFEEDS EQUINE ACCOUNT MANAGER FOR IN-DEPTH INFORMATION ON OPTIMAL PERFORMANCE FEEDING.

Masterfeeds® Equine Nutrition

EXACTOR LITE (TEXTURED)

FOR HORSES IN
INTENSE TRAINING

FEATURES & BENEFITS:

Contains added fat from vegetable oil.

Increases energy density to elevate calorie intake for the same amount of ration. Increases muscle glycogen content, over time (10 to 12 weeks).

No corn included.

Reduces the risk of rapid acid production in large intestine that may cause colic, ulcers, founder and/or diarrhea when adjusting to a higher, total grain intake.

Contains shredded beet pulp.

Increased energy and Crude fibre bulk to support intense physical activity and digestive health.

Contains 100% organic trace minerals.

For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Contains high levels of Vitamin E.

A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

Contains 40 mg/kg Copper.

Involved in RBC hemoglobin formation, Iron mobilization and bone development. Important for many bodily functions.

Designed for feeding with hay.

Advanced nutrition to balance hay feeding for genetically superior performance horses in training.

Masterfeeds® Equine Nutrition

PERFORMANCE

EXACTOR LITE (TEXTURED)

FOR HORSES IN INTENSE TRAINING

Masterfeeds Exactor Lite (textured) is our gold standard ration for the race horse and the needs of the high performance trainer looking for a very palatable, no corn, fibre added, textured feed. Very popular with thoroughbred trainers and well liked across the industry for hard working horses that are fussy eaters and horses with sensitive digestive tracts. This feed is oat and barley based with a supplement pellet containing our premium vitamin mineral pack. It is blended with shredded beet pulp and rich with molasses.

FEEDING DIRECTIONS:

Feed 0.75 to 2 kg per 100 kg of body weight along with good quality hay. To promote good gut health provide a minimum of 1 kg for every 100 kg of body weight of hay spread over multiple feedings throughout the day.

** Feeding rates may vary depending on forage quality and horse's activity level.*

FEEDING TIPS:

For the mature working horse: feed as a sole ration at 1.5 kg per 100 kg of body weight per day will maintain a horse in good condition under light exercise. The working and growing horse will require more feed, up to 1.75 to 2 kg per 100 kg of body weight per day.

Masterfeeds has a long and successful history of delivering quality equine nutrition products and services to horse owners, backed by a national network of resources you can depend on.

Masterfeeds® Equine Nutrition

ALLTRACK (TEXTURED)

FOR ALL TYPES
OF EQUINE
ATHLETES

FEATURES & BENEFITS:

High level of fibre from multiple sources. High fibre level improves digestive health and provides fibre calories, the most natural form of energy for the horse.

High level of fat from vegetable oil. Increases endurance energy for peak performance and provides cool form of calories, excellent for weight gain.

Low level of starch and sugar. A reduced starch and sugar (NSC) diet provides cool energy, and is beneficial for those with a sensitive digestive tract. It also an excellent choice for those horses prone to tying up.

Very concentrated feed.

Condensed calories offer a more efficient way to feed your horses, requiring smaller quantities fed for maximum results.

Contains high levels of Vitamin E. A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Contains 100% organic trace minerals.

For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains both Pre and Probiotics. For improved digestibility of feedstuffs as well and improved gut health.

PATRIOT HORSE RATION (TEXTURED)

FOR LIGHT
PERFORMANCE HORSES

RECREATION & EASY KEEPERS

Masterfeeds Patriot Horse Ration (textured) is a great option for horse owners who are just looking for the basics. A complete and balanced 13.2% protein textured ration meets the requirements of the maintenance horse, horses with minimal activity, or working horses that are relatively easy keepers. It is a palatable sweet feed, with minerals and vitamins at appropriate levels.

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay.

** Feeding rates may vary depending on forage quality and horse's activity level.*

FEATURES & BENEFITS:

Palatable oat-based texture. *Appealing to horses to help ensure a consistent intake.*

Contains molasses. *For improved appearance and increased palatability.*

Contains added trace minerals and vitamins. *essential for good development, hoof quality, and overall health and immunity.*

 **Masterfeeds** Equine Nutrition

SENIOR

PELLET / FOR THE SENIOR HORSE OR PONY

Masterfeeds Senior (pellet) is the ideal feed for the senior horse and also works very well for horses needing an ultra low starch ration with added fat. The premium high calorie digestible fibre sources blended with 6% fat from all vegetable sources makes it a safe choice for working, pleasure, or retired horses who are very sensitive to added starch in their feed and need a low glycemic ration.

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay. As the horse ages, problems with their teeth will mean the forage component of their diet will gradually need to be replaced with processed crude fibres. Rx Roughage cubes or pellets are a great choice to add to the ration at increasing levels. The combination can be soaked to make it easier to consume. Closely monitor your older horse, his or her behaviour, body condition, feed intake, and whether he or she spits out balls of hay. Those are all indicators a change in ration and management is needed.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Added vegetable oil. 6% total fat for added calories to improve body condition in older horses.

Added beet pulp. Excellent source of digestible fibre for improved digestive health.

High quality protein. Provides essential amino acids needed by the senior horse.

Added vitamins including Vitamin C and 100% organic trace minerals. Key nutrients important for immunity, skeletal and muscular integrity and health.

Added B-vitamins. Boosts vitamin intake for horses in high stress or high activity situations when requirements are elevated.

Masterfeeds Master Care Life Plan is nutritional care for the life of your horse. The Plan is divided into five life phases. Each life phase is paired with a proven, quality feed that delivers the nutritional requirements for the development and performance you want to achieve in the specific phase of life of your horse – simplifying the choice, for your peace of mind.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial “bugs” to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

GOLDEN YEARS (CUBE)

FOR THE SENIOR
HORSE OR PONY

Materfeeds Golden Years (cube) is a high calorie very digestible cube, fortified with premium vitamins, added Vitamin C, and contains a higher level of protein and lysine to maintain body condition on older horses. This palatable chunk encourages the horse to chew, which produces saliva and aids digestion. Older horses often drop their food, and the Golden Years Cube is much easier to pick up from the ground than a pelleted or textured diet.

FEEDING DIRECTIONS:*

Feed ½ to 1½ kg per 100 kg of body weight along with good quality hay. As the horse ages, problems with their teeth will mean the forage component of their diet will gradually need to be replaced with processed crude fibres. Rx Roughage cubes or pellets are a great choice to add to the ration at increasing levels. The combination can be soaked to make it easier to consume. Closely monitor your older horse, his or her behaviour, body condition, feed intake, and whether he or she spits out balls of hay. Those are all indicators a change in ration and management is needed..

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Formulated specifically for the older horse and pony. To help maintain the geriatric horse in good condition and health.

Available in cube form. The shape promotes thorough chewing and in turn, helps overall digestion, reduces feed wastage and fines.

Supplies a balance of protein, energy, vitamins and minerals, specific for the geriatric horse. Appropriate levels to maintain health and condition.

Contains added Vitamin C and Vitamin E. Older horses have been shown to have lower plasma Vitamin C. Vitamin E has been shown to be involved in immune responses.

Contains added fat in the form of vegetable oil. Supplies extra energy and improves palatability.

Contains 100% organic trace minerals. For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains Yea-Sacc® 1026 and Pulse 500™. Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

KRUNCH (CUBE)

FOR ALL CLASSES
OF HORSES

SENIOR & SPECIAL NEEDS

This is the original, the one and only, Masterfeeds Krunch (cube). Well known in equine circles, it was developed originally for growth and development for Canada's top thoroughbred farms. Today, it is most often used as a treat and a great way to help with weight gain and add variety to the diet of fussy eaters. It's high in calories, protein and fortified with vitamins and minerals. The calorie protein and amino acid content helps add topline weight.

FEEDING DIRECTIONS:*

Brood Mares & Stallions: Feed 1 to 1½ kg per 100 kg of body weight daily. Nursing mares and stallions in breeding season require the higher level of feeding.

Foals: Feed ¾ to 1 kg per 100 kg of body weight daily.

Weanlings: Feed 1 to 1½ kg per 100 kg of body weight daily.

Growing Horses: Feed ¾ to 1 kg per 100 kg of body weight daily.

With poor quality hay and grass, a higher level feeding will maintain good development.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Available only in cube form. The shape promotes thorough chewing and in turn, helps overall digestion, reduces dust and fines.

Contains 16% Crude Protein. Versatile feed which provides the amino acids essential for gestation and lactation, as well as rapid growth.

Contains a high level of Calcium, Phosphorus, trace minerals and vitamins. Required for milk production, strong bones; to support sound growth, particularly during nursing, and at weaning.

Contains 40 mg/kg Copper. Involved in hemoglobin formation and bone development, both important for good health of the mare, foal, stallion and yearling.

Provides added Biotin. Involved in the integrity of the hoof, often stressed by the demands of competition.

Increased energy level. Total volume of feed required per day is a concentrated amount.

Contains Yea-Sacc® 1026.

Alltech's signature product for gut health, the most frequently studied yeast product worldwide; stabilizes gut health, leading to enhanced digestibility and utilization of nutrients.

 **Masterfeeds** Equine Nutrition

Complete Nutrition for Special Needs.

Masterfeeds Complete GI: Tailored for metabolic management and long-term well-being.

Happy horse.
Happy life.™

COMPLETE GI

FOR HORSES & PONIES WITH SUGAR SENSITIVITIES OR METABOLIC DISORDERS

Masterfeeds Complete GI is an ultra-low NSC feed specially designed for horses and ponies with metabolic challenges. Formulated with pre and probiotics, and a comprehensive organic mineral package, it promotes healthy hindgut fermentation through digestible fibre. With its low feeding rate and reduced calorie content, Complete GI provides an efficient and balanced solution to meet the unique nutritional needs of special needs equines.

FOR MORE INFORMATION ON SPECIAL NEEDS NUTRITION OR TO REQUEST A PERSONALIZED CONSULTATION, EMAIL: happyhorses@masterfeeds.com

Formulated with Solutions from 

COMPLETE GI (PELLET)

FOR HORSES & PONIES
WITH SUGAR SENSITIVITIES
OR METABOLIC DISORDERS

FEEDING DIRECTIONS:*

Feed this feed to horses at the rate of 0.25 kg per 100 kg of body weight along with good quality hay. Feed intake should be based on forage quality and activity level of horse. For additional feeding instructions, contact your Masterfeeds Nutrition and Management Consultant.

FEATURES & BENEFITS:

12% max NSC.

Ultra-low sugar content, specifically formulated for metabolically challenged horses in the recreational equine market, particularly those prone to being over conditioned

Alltech's Total Replacement Technology™ (TRT). Achieved through the inclusion of 100% chelated trace minerals in the form of Bioplex® and Sel-Plex® (Selenium yeast). TRT replaces all non-chelated sources of trace minerals and Selenium. Chelated minerals are readily absorbed, stored and utilized by horses helping with increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development. This modern nutrient management allows for significantly lower trace mineral inclusion levels resulting in a reduced environmental impact.

Moderate fat content.

Controlled calories for metabolic horses prone to weight gain and overconditioning.

Digestible fibre.

Fibre promotes proper gut motility and reduces the risk of digestive disorders such as colic or impaction. High-quality fibre sources ensure consistent and efficient fermentation in the hindgut, supporting a healthy microbial population.

Low feeding rate.

Makes Complete GI both cost effective and safe to feed metabolically challenged horses.

Contains both Pre and Probiotics.

For improved digestibility of feedstuffs as well and improved gut health.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Supports horses with underlying conditions.

Horses that would benefit include those with abnormal glucose metabolisms or other health issues including PPID/Cushing's, seniors, horses that are insulin resistant or have insulin dysregulation, ulcer prone horses, horses with a history of colic, laminitis, equine metabolic disorder, tying up and muscle disorders, PSSM1, overweight easy keepers, and horses with NSC sensitivities in general.

PHASE 5
OF THE
MASTER CARE LIFE PLAN PROGRAM

 Happy horse. Happy life.™

VTM 30

PELLET / FOR ALL CLASSES OF HORSES WHEN EXTRA NUTRIENTS ARE REQUIRED

Masterfeeds Master Care Life Plan is nutritional care for the life of your horse. The Plan is divided into five life phases. Each life phase is paired with a proven, quality feed that delivers the nutritional requirements for the development and performance you want to achieve in the specific phase of life of your horse – simplifying the choice, for your peace of mind.

SUPPLEMENT

Masterfeeds VTM 30 is a concentrated option for horse owners looking to feed protein, minerals and vitamins in a small package. This pellet can be mixed with grains to create a complete ration or fed alone as a highly fortified, low NSC 'diet' ration for animals not needing extra calories or energy.

FEEDING DIRECTIONS:*

Feed 0.1 kg per 100 kg body weight for the maintenance horse. Under heavy working conditions, increase to 0.125 kg per 100 kg. If mixing with grains, blend in 2 to 5 kg of grain per day, depending on desired results. Inclusion rate of grains may differ based on body condition, work load and forage quality.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEEDING TIPS:

All concentrates should be fed with at least 1.5% of body weight per day as good quality forage. Maximizing the contribution of forage reduces digestive upset. Provide free choice access to salt and fresh water. Level of concentrate intake will vary depending on desired growth rate, level of activity, age, season, and quantity and quality of available forage.

FEATURES & BENEFITS:

Protein, vitamin, and minerals. Quality ration for all horses.

Low calorie. When fed alone, is a concentrated source of protein, vitamins and minerals which are often marginal in all-forage diets.

Can be mixed with unfortified grains. Form balanced grain concentrates.

Contains 100% organic trace minerals.

For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development. Extremely valuable for optimum senior horse nutrition.

Contains Yea-Sacc® 1026 and Pulse 500.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial bugs to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

EASY CUBE

FOR EASY KEEPERS
& BROODMARES

Masterfeeds Easy Cube, referred to as our hay balancer, is a 12% protein, mineral and vitamin supplement can be used a great stand alone feed for easy keepers. It's designed to be fed with hay for horses who need little to no grain to maintain weight. It's also a great choice for pregnant mares on good pasture, or as a vitamin mineral top-dress in addition to other feeds.

FEEDING DIRECTIONS:*

Easy Keepers – Maintenance/Work: Feed ¼ kg for every 100 kg of body weight per horse per day along with good quality hay to supply a horse with its vitamin and mineral needs.

Broodmares: Feed ½ kg for every 100 kg of body weight to pregnant mares on good quality pasture and or hay to provide the vitamins and minerals they need for pregnancy.

Easy Cubes can also be mixed with other ingredients such as oats or other feeds and ingredients to be a source of minerals and vitamins.

** Feeding rates may vary depending on forage quality and horse's activity level.*

FEATURES & BENEFITS:

Complete balanced source of trace minerals and vitamins. Simplified way to feed.

Low calorie high fibre cube. Great for horses with low calorie requirement such as "Easy Keepers"

Convenient cube shape. Palatable, and easy to feed on pasture and floor feeders.

Contains 100% organic trace minerals. Increased bio-availability vital for optimum growth and development.

Contains a pro-biotic. Adds more beneficial "bugs" to stabilize the gut, reduce digestive upsets, and maximize nutrient digestion and absorption.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

RX ROUGHAGE (PELLET/CUBE)

MULTI-USE FOR MATURE HORSES & PONIES

Masterfeeds Rx Roughage (pellet/cube) is used as a high fibre feed and as a hay stretcher/extender at times when hay is in short supply. It is also used for horses who have respiratory issues or who struggle consuming hay due to problems with their teeth such as senior horses. Fortified with a lower level of vitamins and minerals it is safe to be fed at very high levels as a complete hay replacement when needed. Ideally however, some long stem hay should be provided.

FEEDING DIRECTIONS:*

Feed Masterfeeds Rx Roughage in a no hay diet at the rate of 1¼ to 1½ kg per 100 kg of body weight per day to maintain a horse in good condition under light exercise. Divide the allowance into three separate feedings daily. A working horse and growing stock will require more feed, up to 2 kg per 100 kg of body weight daily.

Gradually remove hay over a two week period daily, according to the amount of work performed, the condition of the horse and the quality of hay.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

Available in both pellets & cubes. Total nutrition in every bite. Pellets are ideal for bulk applications and the cubed version promotes chewing. Both forms are equal in nutrition. The choice is yours.

Contains a high level of Crude Fibre. Makes a bulkier, safer complete feed with cool calories ideal for hot horses.

Allows for reduced feeding of hay. Extends hay inventory when hay is in short supply or quality is poor, or for horses who can't eat hay due to respiratory concerns or dental problems such as senior horses.

Balanced Calcium to Phosphorus ratio. A balanced ratio is important for good health and development.

100% organic trace minerals.

More bio-available resulting in higher uptake of trace elements which are essential for the development of strong healthy joints and an active immune system.

Contains Yea-Sacc® 1026 and Pulse 500™.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial "bugs" to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Solutions from 

FINISHING TOUCH (PELLET)

FOR IMPROVED PERFORMANCE, WEIGHT GAIN & COAT CONDITION

FEEDING DIRECTIONS:*

Finishing Touch Horse Supplement is designed to be fed with a balanced complete feed, for horses requiring additional calories from protein and fat, typically at a rate of ½ to 1½ kg per horse per day.

For example: Feed ½ kg of Finishing Touch Horse Supplement with 2 kg of a Masterfeeds Complete Feed along with good quality hay to a 500 kg horse in light work.

Feed 1 kg of Finishing Touch Horse Supplement with 3 kg of Masterfeeds Complete Feed along with good quality hay to a 500 kg horse in heavy work.

Adjust quantities of Finishing Touch Supplement and Masterfeeds Complete Feed according to quality of hay, body condition and level of performance to a maximum of 1½ kg per 100 kg of body weight total concentrates.

* Feeding rates may vary depending on forage quality and horse's activity level.

FEATURES & BENEFITS:

20% protein.

A high protein, high fat ration balancer best used as a top-dress for working show and/or performance horses who struggle to maintain weight and muscle.

18% all vegetable fat.

Provides the added fat calories certain classes of horses require for optimum performance.

Contains flax seed.

A very palatable high protein, high fat product, ground for maximum digestion.

Contains both Omega-3 and Omega-6 fatty acids.

A balance of fatty acids is necessary for optimum health and performance.

Contains a full complement of vitamins/minerals.

Can be mixed with a balanced complete feed without diluting out other nutrients.

Contains high levels of Vitamin E.

A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

Contains a pro-biotic. Adds more beneficial "bugs" to stabilize the gut, reduce digestive upsets, and maximize nutrient digestion and absorption.

Contains 100% organic trace minerals.

For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains Yea-Sacc® 1026.

Alltech's signature product for gut health, the most frequently studied yeast product worldwide; stabilizes gut health, leading to enhanced digestibility and utilization of nutrients.

Masterfeeds® Equine Nutrition

LOOSE HORSE MINERAL (G)

EXTRA NUTRIENTS FOR
GROWING OR HEAVILY
WORKED HORSES

FEATURES & BENEFITS:

Balanced supplementation.

Complete and balanced nutrient profile
for all classes of horses.

Palatable.

Ensures consumption.

Minerals.

Formulated using Bioplexes® (organic) trace minerals for optimum absorption and utilization. Better mineral uptake translates to improved growth, stronger immune system, higher quality hair and hoof, improved performance, and stronger overall health.

Vitamins.

Contains high levels of vitamins for improved health and fitness, as well as a full compliment of B-complex vitamins that may not be available through 'self-made' sources or other feedstuffs. A real benefit for stressed, hardworking horses or very young and/or old horses.

Available infused with garlic.

For added flavouring.

Masterfeeds®

Happy horse. Happy life.

Feeding performance.

Masterfeeds® Equine Nutrition

SUPPLEMENT

LOOSE HORSE MINERAL (G)

EXTRA NUTRIENTS FOR GROWING OR HEAVILY WORKED HORSES

Masterfeeds Loose Horse Mineral (G) is formulated for typical mixed forage feeding programs. It is designed for horses fed a forage program predominantly based on hay. Loose Horse Mineral (G) supplies extra vitamins and minerals that are needed during times of stress or when extra nutrients are needed for growing or heavily worked horses. Loose Horse Mineral (G) is available infused with garlic.

FEEDING DIRECTIONS:*

Feed at a rate of 150 to 200 grams (five to seven ounces) per horse per day. Provide fresh water and access to free-choice salt at all times.

Individual mineral, trace mineral and vitamin requirements of horses depend on stage of productions (gestation or lactation), size and age of animal. Likewise, the mineral, trace mineral and vitamin content of forages depends on geographical location and stage of forage growth.

This product contains added copper and should not be fed to sheep or related species that have low tolerance to copper.

* Feeding rates may vary depending on forage quality and horse's activity level.

TARGETED NUTRITION
Blueprint[®]

Equine Premix (G)

Formulated to supply superior nutrition
in a concentrated package.

Blueprint[®] Equine Premix (G) is a unique and effective approach to equine nutrition, designed with cutting-edge nutritional technologies for today's advanced horse genetics. Infused with garlic and formulated with organic trace minerals to support absorption, retention, and utilization in horses.

Feeding Directions:

Feed at a rate of 100 grams (three and a half ounces) per horse per day. Provide fresh water and access to free-choice salt at all times.

** Feeding rates may vary depending on forage quality and horse's activity level.*

Features & Benefits:

Balanced Nutrient Profile. Designed to have a complete and well fortified nutrient profile for all classes of horses.

Palatable. No fillers make this mineral palatable, ensuring consumption.

Contains 100% organic trace minerals. For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains Sel-Plex[®]. This naturally occurring form of Selenium is non-toxic and has antioxidant properties; proven to strengthen the immune system and reproductive function; increases performance and exercise tolerance, and enhances overall heart and muscle health.

High fortification of vitamins. Packed with a complete vitamin profile for improved health and fitness, including a full range of B-vitamins to benefit high-stress, hard-working, and very young and/or older horses when self-manufacture cannot fulfill requirements.

Contains Actigen[®]. An all-natural product, derived from yeast, resulting in improved GI function and nutrient absorption.

Contains Yea-Sacc^{® 1026}. Alltech's signature product for gut health, the most frequently studied yeast product world-wide; stabilizes gut health, leading to enhanced digestibility and utilization of nutrients.

Contains NuPro[®]. An all-natural yeast derived product made up of nucleotides, B-complex vitamins and key amino acids which play a key role in metabolism.

Contains Integral[®]. A natural solution that keeps your horse healthy and allows them to achieve their true potential whether in growth, reproduction or performance.

Infused with garlic. For added flavouring.

This feed contains added Selenium at 15.0 mg/kg.

HORSE BLOCK SUPPLEMENT

FOR ALL CLASSES
OF HORSES

LOW MOISTURE BLOCK

Masterfeeds Rite-Lix™ Horse Block Supplement is a molasses-based block for all classes of horses. Appropriate for foals, weanlings, yearlings, pregnant and lactating mares, breeding stallions and performance horses. These blocks are manufactured through a controlled and precise cooking process where molasses is dehydrated, cooled and then blended with protein, vitamins, minerals and trace nutrients. Rite-Lix Horse Block Supplement is a consistently hard block that will not crack or crumble and it is impervious to weather. Rite-Lix Blocks can't be bitten or chewed. Rite-Lix Horse Block Supplement is appropriate for situations where pastures may be of diminished quality, such as late fall or winter pastures and during times of drought.

FEEDING DIRECTIONS:

Masterfeeds Rite-Lix Horse Block Supplement is designed for self-feeding to all classes of horses. Place containers in dry spots near loafing areas and watering locations. Free-choice consumption will depend on climate, size of the animals fed, as well as quality, source and availability of other feeds. Providing this block to equines while housed in stalls will increase consumption.

Feed at the rate of one container for every 15 to 20 heads. Provide a minimum of two containers in each lot or pasture to ensure proper accessibility. Horses typically consume between 450 grams and 1.1 kilos per head daily.

FEATURES & BENEFITS:

Essential nutrients.

For horses on all-pasture diets or those receiving unfortified grain concentrates.

Exceedingly low moisture levels.

No chemical hardeners or binders are needed.

Free choice protein, vitamin and mineral block supplement. For all classes of horses.

NOTES:

When horses are first introduced to molasses-based blocks it is common for them to consume more than the expected level for a short period of time. Horses who are not receiving any other type of mineral supplementation are especially prone

to over consumption perhaps due to underlying dietary deficiencies. For horses confined to small areas, novelty and herd dynamics may also play a part in initial over consumption. Consumption should stabilize within two weeks. If it continues to be high you should re-evaluate your overall feeding program to be sure your animals nutritional needs are being met. If a dominant horse is over consuming out of a desire to keep the other horses away from the block, consider placing another block in the pasture away from the first one. Provide free-choice access to fresh water.

This feed contains added Selenium at 0.73 mg/kg.

Blueprint®

BREEDER 18 BLOCK SUPPLEMENT

FORMULATED
FOR BEEF CATTLE
& HORSES

LOW MOISTURE BLOCK

Masterfeeds Rite-Lix™ Blueprint® Breeder 18 Block Supplement is formulated to provide protein, energy, minerals and vitamins to complement a forage-based diet.

WHO USES:

Masterfeeds Rite-Lix™ Blueprint® 18 Block Supplement is ideal for either cattle and horses in preparation for the breeding season or calves and/or horses during periods of stress or high mineral demand.

FEEDING DIRECTIONS:

Masterfeeds Rite-Lix™ Blueprint® 18 Block Supplement is designed for self-feeding to grazing or cut-forage fed beef cattle or horses. Place containers in dry spots near loafing areas and watering locations. Provide a minimum of two containers in each lot or pasture to ensure proper accessibility. Free-choice consumption will depend on climate, size of the animals fed, as well as quality, source and availability of other feeds. Feed at the rate of one container for every 20 to 30 head. Cattle typically consume between 125 and 450 grams per head daily. Masterfeeds Rite-Lix™ Blueprint® Breeder 18 contains no salt.

FEATURES & BENEFITS:

100% Sel-Plex® Selenium. Readily absorbed, stored and utilized by the animal to optimize animal performance. Selenium supports reproductive health, protects integrity of tissues, and is readily transmissible from placenta to fetus.

100% of trace minerals coming from Bioplex®. Easily absorbed, readily metabolized to optimize animal performance. Organic trace minerals contribute to reproductive performance, and support the body's defense system.

Contains Actigen®. Supports health and livability; optimal growth and development, reduced use of therapeutic treatments, livestock management and nutrient transfer from dam to young.

Contains 1,250 IU/kg vitamin E. Promotes immune function, reproductive health, and enhances stress fighting ability.

Contains high levels of vitamins A and D.
Promotes optimal health status.

18% protein from all natural sources.
Helps livestock meet protein requirements.

Low moisture molasses block. Stimulates licking action; reduces acidosis and digestive upset while encouraging intake.

NOTES:

1. Directions for use must be carefully followed.
2. Do not feed in association with another feed containing supplemental Selenium.
3. Do not feed mouldy or contaminated feed as it can lead to illness or death.
4. This product, which contains added copper should not be fed to sheep or other species that have a low tolerance to supplemental copper.

This feed contains added Selenium at 6.0 mg/kg.

TIPS FOR USING SWEETLIX® WILDLIFE SUPPLEMENTS:

Mother Nature doesn't always provide enough nutrients for wildlife. Sweetlix® Wildlife supplements fill your conservation needs by keeping populations plentiful and healthy.

- Locate blocks near feeding, drinking or bedding areas or near walkways.
- To use pressed blocks, remove wrapper without touching block to avoid leaving human scent on the block. Take the wrapper with you.
- Provide adequate number of blocks (as directed by the product label) to allow access to blocks by targeting wildlife species.
- Avoid placing blocks where cattle or other domestic animals will have access to them as they will consume these products. If this is impossible, place blocks in rough terrain where livestock normally do not graze.
- Keep blocks available at all times to ensure consistent consumption and to keep wildlife coming back again and again to help promote maximum growth, health and vitality.

Controlled, continuous, cost-efficient nutrient delivery.

Sweetlix® weather-resistant pressed supplement blocks deliver balanced nutrients in regular daily doses, promoting optimal animal performance with high-quality ingredients for enhanced palatability and digestion.

SWEETLIX® LIVESTOCK SUPPLEMENTS:

Sweetlix® All-In-One is designed to supplement small ruminants consuming low quality forages and promotes optimum growth and reproduction. Ideal in situations where copper is a concern.

DIRECTIONS FOR USE: FEED AT A RATE OF ONE BLOCK PER FIVE TO TEN HEAD. SHEEP AND GOATS SHOULD CONSUME 50 TO 100 G PER HEAD DAILY.

Sweetlix® Meat Maker® is designed to promote the health and well-being of your goats through proper nutrition. Added Bioplex® organic trace minerals are easily absorbed and readily metabolized.

DIRECTIONS FOR USE: FEED AT A RATE OF ONE BLOCK PER FIVE TO 15 HEAD. GOATS SHOULD CONSUME 50 TO 100 G PER HEAD DAILY.

Sweetlix® Equine Pasture & Hay Balancer is ideal for supplementing hay and limited pastures, delivering 20% protein from all natural sources. Placed directly in pastures or paddocks – no shelter needed.

DIRECTIONS FOR USE: FEED AT A RATE OF ONE BLOCK PER FIVE HEADS. HORSES SHOULD CONSUME AN AVERAGE OF ½ TO 1½ KG PER HEAD DAILY BASED ON A 500 KG ANIMAL.

Sweetlix® 3-in-1 is a multi-purpose block for beef cattle and/or horses. This block is superior to trace mineral salt blocks and can be placed directly in pastures or paddocks – no shelter needed.

DIRECTIONS FOR USE: FEED AT A RATE OF ONE BLOCK PER FIVE HEAD OF CATTLE OR HORSES. CATTLE AND HORSES WILL CONSUME APPROXIMATELY 140 G PER HEAD DAILY.

Sweetlix® 10% Phos Mineral/Vitamin is formulated to address seasonal/forage variables as well as differing animal needs. **DIRECTIONS FOR USE:** FEED ONE BLOCK PER FIVE HEAD OF CATTLE FREE-CHOICE AT A RATE OF 90 TO 230 G PER HEAD DAILY.

*200 lb tubs include 20% All-Purpose Compressed (for beef cattle, horses, sheep and goats), 20% & 25% Compressed (for beef cattle).

Sweetlix® Whitetail Deer Block

is scientifically balanced to supplement deer's natural vegetation by providing protein, minerals, vitamins and energy necessary for optimal growth, antler and bone development and reproduction.

DIRECTIONS FOR USE: CONSUMPTION OF SWEETLIX® WHITE TAIL DEER BLOCK WILL VARY ACCORDING TO BODY WEIGHT AND THE QUALITY AND QUANTITY OF AVAILABLE NATURAL VEGETATION. FEED GROWING AND BREEDING DEER AT THE RATE OF ½ TO 1 KG PER HEAD DAILY.

Sweetlix® Game Bird & Fowl Block

is designed especially for the needs of wild fowl. Made with wholesome grains, minerals and vitamins critical for growth and egg production, Sweetlix® provides essential nutrients.

DIRECTIONS FOR USE: PROVIDE FREE-CHOICE TO WILD BIRDS. IT MAY BE NECESSARY TO PROVIDE MORE THAN ONE BLOCK FOR ACCESS PURPOSES. PLACE BLOCKS IN AN APPROPRIATE FEEDER OR ON THE GROUND AWAY FROM EXCESSIVE MOISTURE.

ONLY AVAILABLE THROUGH MASTERFEEDS OR YOUR LOCAL MASTERFEEDS DEALER.

3-IN-1 | MULTI-PURPOSE BLOCK FOR HORSES & BEEF CATTLE

Sweetlix® 3-in-1 is a multi-purpose, free-choice, highly palatable vitamin and mineral supplement block for beef cattle and/or horses. This block is superior to trace mineral salt blocks and can be placed directly in pasture.

FEEDING DIRECTIONS:

Feed one block per five head of cattle or horses. This allows all animals equal access to blocks.

Place blocks where animals congregate. Locate blocks throughout pasture, placing them near water and loafing areas. Maintain adequate distance between blocks (three metres minimum).

Do not allow animals to run out of blocks. When a block is half- consumed, place a new block near it. Place very small pieces in troughs or feed pans.

Cattle and horses will consume approximately 140 g per head daily. When cattle and horses consume the block at the recommended rate, it will supply 3 mg of supplemental Selenium.

Blocks can be fed to animals in confinement. Exact location of blocks to obtain desired consumption will vary between confinement feeding programs.

Feed as the only free-choice source of salt, other minerals and vitamins.

NOTE:

Store blocks in a cool, dry area away from rodents and insects.

This feed contains added Selenium at 21.6 mg/kg.

EQUINE PASTURE & HAY BALANCER

FOR ALL HORSES

HORSE BLOCK

Sweetlix® Equine Pasture & Hay Balancer is a free-choice supplement block for horses and a mineral, vitamin and protein supplement in one. Ideal for supplementing hay and limited pastures, it delivers 20% protein from all natural sources. This is a weather-resistant block and can be placed directly in pastures or paddocks with horses – no shelter needed.

INTRODUCTORY PERIOD:

Following a seven to 10 day acclimation period, average consumption should be ½ to 1½ kg per head per day for horses with unrestricted forage supplies. Position the blocks 15 to 25 metres from loafing, feeding and watering areas. Some repositioning of blocks may be necessary as animals become acclimated to the presence of the blocks. Move blocks closer to increase consumption; further away to decrease consumption. If overconsumption occurs for more than two weeks and repositioning of blocks does not correct the situation, remove blocks and evaluate the overall feeding program. **Do not allow starved animals free access to this block.**

FEEDING DIRECTIONS:

Feed one block per five horses. This allows all animals equal access to blocks.

Place tubs where horses congregate. Locate blocks throughout pasture, placing them near water and loafing areas. Maintain adequate distance between blocks (three metres minimum).

Do not allow horses to run out of blocks. When a block is half- consumed, place a new tub near it.

Horses should consume an average of ½ to 1½ kg per head daily based on a 500 kg animal.

Feed as the only self-fed source of protein, salt, other minerals and vitamins.

Blocks can be fed to animals in confinement. Exact location of the blocks to obtain desired consumption will vary between confinement feeding programs.

FEATURES & BENEFITS:

Reliable, self- fed protein, mineral and vitamin supplement in one. Compliments most popular horse feeds.

Convenient, weather-resistant blocks. Can be placed directly in pastures, shelter or special feeders not needed.

Auto-regulated consumption technology. Ensures that horses eat correct amounts.

NOTE:

Store blocks in a cool, dry area away from rodents and insects.

This feed contains added Selenium at 2.6 mg/kg.

20% ALL-PURPOSE COMPRESSED MINERAL/VITAMIN BLOCK

FREE-CHOICE SUPPLEMENT
BLOCK FOR BEEF CATTLE,
HORSES, SHEEP & GOATS

MULTI-SPECIES COMPRESSED BLOCK

Sweetlix® 20% All-Purpose Compressed Mineral/Vitamin Block is a multi-purpose, free-choice, highly palatable vitamin and mineral supplement block for beef cattle, horses, sheep and goats. This block is superior to trace mineral salt blocks and can be placed directly in pasture.

FEATURES & BENEFITS:

Multi-purpose mineral and vitamin block for cattle and horses. Superior to trace mineral salt blocks.

Palatable. Source of high quality minerals and vitamins.

Weather-resistant block. Can be placed directly in pastures with cattle or horses, no costly covered feeders or bunks required.

FEEDING RECOMMENDATIONS:

- Feed one block per 20 to 30 head of cattle or horses or one block per 20 to 40 head of sheep or goats (timid and smaller animals need their share).
- Place blocks where animals congregate. Locate throughout pasture at loafing, grazing, feeding and watering areas. Maintain at least three meters between blocks.
- Feed blocks continuously along with plentiful sources of forage and clean, fresh water. Animals should not run out of blocks. Provide a new block when $\frac{2}{3}$ consumed.
- Cattle and horses should consume 450 to 900 grams per head daily based on a 454 kg animal. Sheep and goat should consume 90 to 200 grams per head daily
- Consumption of this block may vary depending on animal body condition, quality and quantity of forages fed, seasonal weather conditions, and most importantly, location of block with respect to loafing, grazing, feeding and watering areas.
- If additional mineral and vitamin fortification is desired, provide an appropriate

INTRODUCTION PERIOD:

Following a 7 to 10 day acclimation period, average consumption should be 450 to 900 grams for mature cattle and horses and 90 to 200 grams for sheep and goats with unrestricted forage supplies. Position the blocks approximately 16 to 25 meters from loafing and/or watering areas. Some repositioning of blocks may be necessary as animals become accustomed to the blocks. Move block closer to increase consumption, further away to decrease consumption. If overconsumption occurs for more than two weeks and repositioning of the blocks does not correct the situation, remove the blocks and evaluate overall feeding program.

DO NOT PROVIDE STARVED ANIMALS FREE ACCESS TO THIS SUPPLEMENT.

This feed contains added Selenium at 3.3 mg/kg.
