# BLUEPRINT® 20 AN

FOR CATTLE DURING TIMES WHEN PROTEIN DELIVERY IS CRITICAL

BEEF SUPPLEMENT BLOCK

CrystalBlox™ is the latest patented block form developed by the makers of Crystalyx® Brand Supplements. It combines the economical nutrient delivery and fortification of compressed blocks with the consistent and predictable intake of low moisture block (LMB) technology. CrystalBlox™ will fit a wide variety of feeding situations in which protein delivery is critical.

### WHO USES?

CrystalBlox™ is designed and formulated to provide supplemental protein to help improve forage utilization by increased forage intake and improved fibre digestibility. In situations where forage crude protein levels are low due to drought or with advanced maturity such as fall and winter forages, CrystalBlox™ can provide the supplemental protein to help extract more energy and nutrients from your forage supplies.

### FEEDING DIRECTIONS:

CrystalBlox™ Blueprint® 20 AN is designed for self-feeding to all classes of beef cattle fed moderate to high quality forages. Self-fed consumption will depend on size of animals fed, as well as quality, source and availability of other feeds, and the number of supplement containers provided.

This unique block form combines the controlled intake of a low-moisture block with the higher nutrient delivery of a compressed block. Feed at the rate of one container for every 10 to 40 head, with a minimum of two containers in each lot or pasture to ensure proper accessibility. Mature cattle typically consume between 0.75 and 1.5 lbs per head per day (based on a 1,200 lb animal).

**All consumption figures stated here are approximate. Provide free access to fresh, clean water at all times.**

### FEATURES & BENEFITS:

**Hybrid block form.** Combines payload delivery of a compressed block with predictable intake of a low moisture block.

**Blueprint® Total Replacement Technology.** Features Bioplex® organic trace minerals as the only source of Cobalt, Copper, Manganese and Zinc. Bioplex® provides mineral nutrition in a form as close to nature as possible.

**20% All-natural protein.** Ideal for all classes of cattle on moderate to high quality forages.

**Complete supplement, including salt.** Provides essential minerals and vitamins.

**This feed contains added Selenium at 3.3 mg/kg.**

### GUARANTEED ANALYSIS

Crude Protein (minimum).....	20.0%
Crude Fat (minimum) .....	3.0%
Calcium (actual).....	2.0%
Phosphorus (actual) .....	1.0%
