# ROBO-MAX™

## 18% OR 20%

(ROBOT PELLETS)

FOR DAIRY COWS  
USING AN AUTOMATED  
FEEDING SYSTEM

### A pellet that will keep them coming back.

*Masterfeeds Robo-Max Robot Pellets are designed to enhance the drivability of cows to robot milkers. With highly palatable ingredients, a unique flavor profile and excellent pellet quality characteristics, using Robo-Max will mean shorter fetch lists with more opportunities to harvest milk.*

**Masterfeeds – the experts in robot milking:**

- **Experience:** we've been feeding robots in Canada since 2000.
- **Selection:** There are many options available in the Robo-Max line up including 18% and 20% protein pellets or a 30% option to be mixed with on-farm grains.
- **Quality:** Meet your production goals with a dedicated staff, quality ingredients, and HACCP approved manufacturing facilities.

FOR WHAT  
GOES INTO  
ALL YOU DO.™

ROBO-MAX™

18% OR 20%  
(ROBOT PELLETS)FOR DAIRY COWS  
USING AN AUTOMATED  
FEEDING SYSTEM

Robo-Max Robot Pellets are highly palatable feeds, intended to be fed to dairy cows through an automated feeding system. Fed in conjunction with a balanced partial mixed ration, Robo-Max provides supplemental energy and protein to encourage maximum visits to automated milking/feeding stations.

**DIRECTIONS FOR USE:**

Feed Robo-Max Robot Pellets at a rate sufficient to deliver 1.0 to 3.0 kg per visit.

Feeding speed should be adjusted in conjunction with average milking speed, but should fall into the range of 300 to 400 grams per minute.

Successful feeding in robotic systems is entirely dependent on having a properly balanced bunk recipe.

Follow an on-farm feeding program provided by your Masterfeeds Account Manager.

**Complementary levels of vitamins, chelated trace minerals (TRT) and macro minerals.**

*Chelated trace minerals are readily absorbed, stored and utilized by the cow helping her meet nutrition requirements and achieve optimal health.*

**Start-Up formula available.** Extra enticing feed for the switch from the parlour to the Robot to encourage more visits to the robot. Minimizes fetch cows at start-up and the stress of transition to the new system.

**FEATURES & BENEFITS:**

**Hard pellet.** Designed for optimal flow and reduced fines in automated feeding systems.

**High quality, palatable ingredients with a unique blend of flavors.** Specifically formulated for optimum intake, while avoiding issues associated with acidosis. Keeps them happy for the entire milking. This means fewer kicked-off milkers!

**All natural protein with a specific balance of by-pass protein and amino acids.** Ensures palatability and performance.

**High quality fermentable fibre.** Provides more digestible fibre as fermentable sources of energy. This keeps her milking with good feet and components, while helping her to breed back in shorter days.
