

CONDITIONING PERFORMANCE WEIGHT GAIN & COAT CONDITION

FEATURES & BENEFITS:

25% high quality all vegetable protein.

Excellent source of amino acids required for health, maintenance and development of muscle and topline.

12% all vegetable fat.

Provide the added fat calories certain classes of horses require for optimum performance.

Contains flax.

The best source of Omega-3 fatty acids, excellent for improved health and coat condition.

Contains both Omega-3 and Omega-6 fatty acids.

A balance of fatty acids is necessary for optimum health and performance.

Contains a full complement of vitamins and minerals.

Can be top-dressed on used on its own to provide nutrients required but all classes of horses.

Excellent source of Vitamin C.

Important antioxidant for hard working horses and those under stress.

Excellent source of B complex vitamins including Biotin.

Key nutrients for good health, muscle function, energy metabolism, and hoof health.

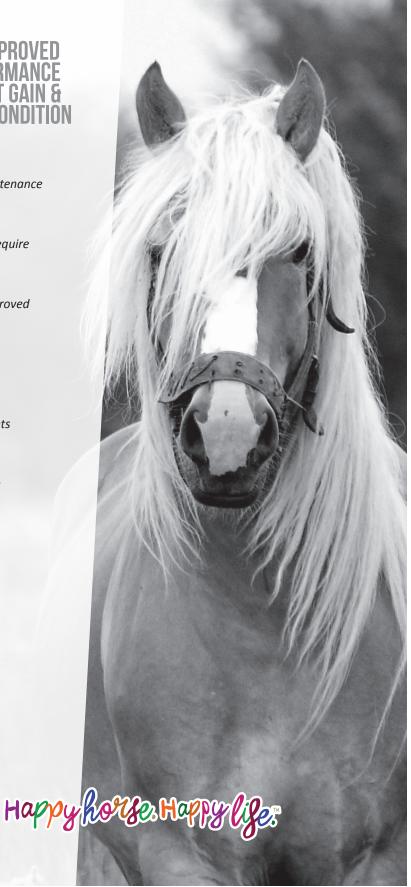

Contains a high level of Vitamin E.

Higher fat diets need to be balanced with higher Vitamin E levels; Vitamin E is a powerful antioxidant, which enhances immune response, optimizes nerve and muscle function and improves tissue regeneration.

Contains 100% organic trace minerals.

For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

CONDITIONING SUPPLEMENT

FOR IMPROVED PERFORMANCE, WEIGHT GAIN & COAT CONDITION

For the performance horse – improve performance, mineral vitamin supplementation, weight gain and coat condition with Masterfeeds Conditioning Supplement. It is designed to be fed as a top-dress on top of a balanced feed to provide extra calories, fat, vitamins and minerals. It can also be fed with oats or other grains as a complete source of supplemental nutrients for a well-rounded performance diet.

FEEDING DIRECTIONS:*

Typical quantities are 100 to 700 grams per head per day. For example: Topdress 100 to 200 grams on top of a good quality complete feed when horses need additional nutrients to working horses through periods of intense work and stress, growing horses, pregnant mares, lactation, during breeding season, or any horse that can benefit from additional calories, protein and minerals and vitamins. 500 to 700 grams per head per day is typically required when supplement is the sole source of minerals and vitamins. Adjust quantities according to size of horse, quality of base ration, hay, body condition and level of performance. For more information contact your Masterfeeds Account Manager.

* Feeding rates may vary depending on forage quality and horse's activity level.

This feed contains added Selenium at 1.5 mg/kg.
