The Sweet Taste of Success.

Supplements can only provide predictable performance if they are consumed consistently. Sweetlix delivers balanced levels of nutrients in regular daily doses and utilizes high quality ingredients for increased palatability and optimum animal performance. Unlike some blocks, Sweetlix pressed blocks are highly palatable as well as weather-resistant.

SWEETLIX® PRODUCT LINE UP:

3-IN-1 A multi-purpose, free-choice, highly palatable vitamin and mineral supplement block for **beef cattle** and/or **horses**. This block is superior to trace mineral salt blocks and can be placed directly in pasture.

10% PHOS MINERAL/VITAMIN A supplement

mineral for **beef cattle**.

EQUINE PASTURE & HAY BALANCER

This convenient free-choice supplement block for **horses** and a mineral, vitamin and protein supplement in one. Ideal for supplementing hay and limited pastures, it delivers 20% protein from all natural sources. This is a weather-resistant block and can be placed directly in pastures or paddocks with horses - no shelter needed.

FOUINE

ALL-IN-ONE This convenient highly palatable freechoice protein supplement block for **sheep** and **goats** is a mineral, vitamin and protein supplement in one. This block is specifically designed to supplement small ruminants consuming low quality forages and allows for optimum growth and reproduction. Safe for cattle, goats and sheep. Ideal in situations where copper is a concern when species are co-mingling.

WHITETAIL DEER BLOCK Formulated to provide *deer* with supplemental protein, energy, minerals and vitamins necessary for antler growth.

GAME BIRD & FOWL BLOCK Designed especially for the needs of **wild fowl**. Made with wholesome grains, minerals and vitamins critical for growth and egg production, Sweetlix provides essential nutrients.

ഫി)

Sweetlix Equine Pasture & Hay Balancer is a free-choice supplement block for horses and a mineral, vitamin and protein supplement in one. Ideal for supplementing hay and limited pastures, it delivers 20% protein from all natural sources. This is a weather-resistant block and can be placed directly in pastures or paddocks with horses – no shelter needed.

INTRODUCTORY PERIOD:

Following a seven to 10 day acclimation period, average consumption should be ½ to 1½ kg per head per day for horses with unrestricted forage supplies. Position the blocks 15 to 25 metres from loafing, feeding and watering areas. Some repositioning of blocks may be necessary as animals become acclimated to the presence of the blocks. Move blocks closer to increase consumption; further away to decrease consumption. If overconsumption occurs for more than two weeks and repositioning of blocks and evaluate the overall feeding program. **Do not allow starved animals free access to this block.**

FEATURES & BENEFITS:

Reliable, self- fed protein, mineral and vitamin supplement in one. Compliments most popular horse feeds.

Convenient, weather-resistant blocks. Can be placed directly in pastures, shelter or special feeders not needed.

Auto-regulated consumption technology. Ensures that horses eat correct amounts.

NOTE:

Store blocks in a cool, dry area away from rodents and insects.

FEEDING DIRECTIONS:

Feed one block per five horses. This allows all animals equal access to blocks.

Place tubs where horses congregate. Locate blocks throughout pasture, placing them near water and loafing areas. Maintain adequate distance between blocks (3 metres minimum).

Do not allow horses to run out of blocks. When a block is half- consumed, place a new tub near it.

Horses should consume an average of $\frac{1}{2}$ to $\frac{1}{2}$ kg per head daily based on a 500 kg animal.

Feed as the only self- fed source of protein, salt, other minerals and vitamins.

Blocks can be fed to animals in confinement. Exact location of the blocks to obtain desired consumption will vary between confinement feeding programs. This feed contains added Selenium at 2.6 mg/kg.
