# MASTERFEEDS<sup>®</sup> VIGOR<sup>™</sup> | SWINE PROGRAM AT A GLANCE

Masterfeeds Vigor Swine Program provides a full range of complete feeds, supplements, and premix products for your operation. Optimal swine performance requires the successful interaction of nutrition, genetics, environment, herd health, facilities and management. Masterfeeds Vigor products are formulated to support strong pig vitality and provide phased nutritional requirements throughout the complete life cycle, supporting cost-effective optimal gains.

**The Masterfeeds Vigor Pig Starter Nutrition Program** for commercial operations is an important nutritional strategy to support strong pig vitality and optimal gains during every growth stage in the nursery. The transition at weaning is one of the most stressful times in a pig's life. The failure to provide an optimal environment with respect to housing, temperature, nutrition and health can have a tremendous effect on the ability of the pig to maximize its potential for growth. A good start in the nursery has been shown to result in a reduction in the days to market. The Vigor<sup>™</sup> Pig Starter Rations are formulated to match the pig's nutritional requirements during each stage of the nursery to:

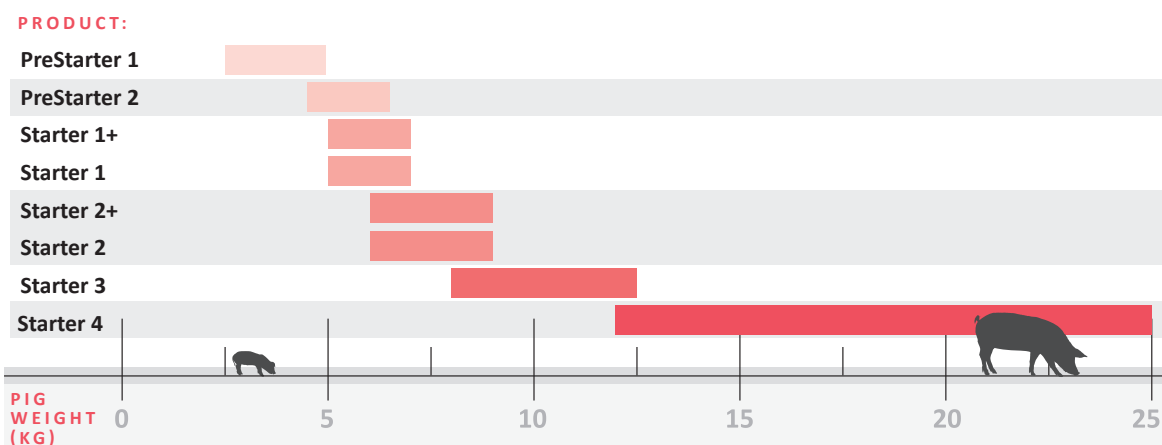

- *be highly palatable to promote intake*
- *ease the transition from weaning to less complex rations*
- *support early and sustained gains*
- *aid in gut integrity and function*
- *optimize digestive enzyme development*

**Masterfeeds Vigor Pig Starter Rations** have been developed through research to contain a unique blend of highly digestible ingredients, a specific enzyme combination, direct fed microbial, acidifiers and organic minerals to support cost effective gains and promote intestinal health during the nursery period.

**Masterfeeds Vigor Swine Grower Nutrition Program** for commercial operations provides the proper balance of digestible amino acids and energy for optimal gains during the growing and finishing period. The program is flexible and can be designed specifically to meet unique producer requirements.

**Masterfeeds Vigor Sow Nutrition Program** for commercial operations incorporates the nutritional research to optimize breeding herd productivity at each stage of the reproductive cycle (gilt development, breeding, gestation and lactation). Optimal reproductive performance requires the successful interaction of nutrition, genetics, environment, herd health, facilities and management.

## Life Cycle Feeding Guide // Starter Feeds

## Water Consumption Rates for Swine

TYPE OF PIG	CONSUMPTION (LITRES PER DAY)	MINIMUM (LITRES)
Suckling Pig		0.3
Nursery 5 – 25 kg	0.5 – 2.5	0.7
Weaner 25 – 40 kg	2.5 – 4	1.0
Grower 40 – 70 kg	4 – 7	1.3
Finisher 70 – 120 kg	7 – 9	1.5
Pregnant Sow	9 – 15	1.5
Lactating Sow	18 – 35	2.0
Nipple/Bite		1.5 – 2.0
Nose Drinker		2.5

## Floor Space Requirements for Swine

### Specialized Swine Environment Support

Masterfeeds swine specific Account Managers are knowledgeable in the collaborative total barn approach to achieving optimal health and return on gains. Performance solutions are unique and should factor in all areas affecting optimum growth potential. Masterfeeds Account Managers see all types of barn styles, herd sizes, health concerns and solutions, feeding challenges and successes across their territories every day. This enables collaboration among Account Managers and stronger one-on-one customer support through troubleshooting relationships that develop with customers and barn assessment strategies, which look at not only feed but the total barn environment as well.

# VIGOR™ PRE-STARTER 1

FOR FEEDING TO YOUNG  
PIGLETS AS A CREEP FEED  
OR EARLY PRE-STARTER

COMMERCIAL PRE-STARTER

Masterfeeds Vigor Pre-Starter 1 provides an un-paralleled blend of digestible and palatable ingredients to ensure a quick start and fast efficient growth through the nursery growing period.

## WHO USES:

A performance oriented producer who wants to maximize growth and efficiency in the nursery or wants early or light weight pigs. This excellent pre-starter ration incorporates specific ingredients proven to improve digestibility and reduce anti-nutritional factors that inhibit results.

## FEEDING DIRECTIONS:

Masterfeeds Vigor Pre-Starter 1 provides an un-paralleled blend of digestible and palatable ingredients to ensure a quick start and fast efficient growth through the nursery growing period. Masterfeeds Vigor Pre-Starter 1 is suitable for feeding as a creep feed with the sow and is ideal as a pre-starter for piglets weaned from 2.5 kg body weight. It is also recommended as the pre-starter for lighter weaning weights – up to 4.5 kg of live body weight. Typical usage will range from 0.5 kg to 1.5 kg per pig.

## FEATURES & BENEFITS:

**Strategic enzyme combination.** Improves digestibility of vegetable based protein and nutrient absorption for better growth and efficiency.

**Direct-fed microbial.** Intended to promote the growth of beneficial intestinal micro flora and improve ingredient digestibility and aid in improving gut health and function.

**Comprehensive vitamin and organic mineral package.** Aids in promoting healthy vigorous piglets for maximum growth potential.

## High quality milk and specialty proteins.

Specifically matches the digestive capabilities of the young growing pig ensuring optimum digestive health to support maximum growth and efficiency.

## FEEDING TIPS:

1. Weaning young pigs into a proper environment is critical to ensure good health and performance throughout the nursery phase. Follow proper stocking density, temperature, humidity and ventilation guidelines for managing nursery pigs. Keep feed fresh in feeders and feed multiple times per day in the first 48 to 72 hours and ensure there is an adequate supply of clean fresh drinking water.
2. Feed Masterfeeds Vigor Pre-Starter 1 according to the feed budget developed for your individual needs/goals. Change gradually on to the next stage diet at approximately 4.5 kg body weight.

SWINE PROGRAM

# VIGOR™ PRE-STARTER 2

FOR FEEDING TO YOUNG  
PIGLETS AS A CREEP FEED  
OR EARLY PRE-STARTER

Masterfeeds Vigor Pre-Starter 2 provides an un-paralleled blend of digestible and palatable ingredients to ensure a quick start and fast efficient growth through the nursery growing period.

## WHO USES:

A performance oriented producer who wants to maximize growth and efficiency in the nursery or wants early or light weight pigs. This excellent pre-starter ration incorporates specific ingredients proven to improve digestibility and reduce anti-nutritional factors that inhibit results.

## FEEDING DIRECTIONS:

Masterfeeds Vigor Pre-Starter 2 provides an un-paralleled blend of digestible and palatable ingredients to ensure a quick start and fast efficient growth through the nursery growing period. Masterfeeds Vigor Pre-Starter 2 is suitable for feeding as a creep feed with the sow and is ideal as a pre-starter for piglets weaned from 4.5 kg body weight up to 7.0 kg. It can be fed following Pre-Starter 1. The maximum recommended feed allowance per pig is 3.0 kg. Typical usage will range from 0.5 kg to 2.0 kg per pig.

## FEATURES & BENEFITS:

**Strategic enzyme combination.** Improves digestibility of vegetable based protein and nutrient absorption for better growth and efficiency.

**Direct-fed microbial.** Intended to promote the growth of beneficial intestinal micro flora and improve ingredient digestibility and aid in improving gut health and function.

**Comprehensive vitamin and organic mineral package.** Aids in promoting healthy vigorous piglets for maximum growth potential.

# VIGOR™ STARTER 3

FOR FEEDING TO  
PIGS TRANSITIONING  
FROM COMPLEX DIETS

COMMERCIAL STARTER

Masterfeeds Vigor Starter 3 provides a blend of highly digestible and palatable ingredients to ensure a smooth transition and fast efficient growth following complex pre-starter diets.

## WHO USES:

A producer who wants a palatable diet for optimal growth and efficiency in the nursery. This excellent starter ration incorporates specific ingredients proven to improve digestibility and growth during the critical transition growth period in the nursery

## FEEDING DIRECTIONS:

Masterfeeds Vigor Starter 3 provides a blend of highly digestible and palatable ingredients to ensure a smooth transition and fast efficient growth following complex pre-starter diets. It is ideal as a starter for pigs weighing from 8 kg to 12 kg. It can be fed following Vigor 2+ or 2 in a multi-phase starter program. Typical usage will range from 4.5 kg to 6.5 kg per pig.

## FEATURES & BENEFITS:

**Strategic enzyme combination.** Improves digestibility of vegetable based protein and nutrient absorption for better growth and efficiency.

**Direct-fed microbial.** Intended to promote the growth of beneficial intestinal micro flora and improve ingredient digestibility and aid in improving gut health and function.

**Comprehensive vitamin and organic mineral package.** Aids in promoting healthy vigorous piglets for maximum growth potential.

**Acidified.** Improves digestibility and promotes optimal growth.

## FEEDING TIPS:

1. A proper environment is critical to ensure good health and performance throughout the nursery phase. Follow proper stocking density, temperature, humidity and ventilation guidelines for managing nursery pigs. Keep feed fresh and ensure there is an adequate supply of clean fresh drinking water.
2. Feed Masterfeeds Vigor Starter 3 according to the feed budget developed for your individual needs/goals. Change gradually on to the next stage diet at approximately 12.5 kg of body weight.

# VIGOR™ STARTER 4

FOR FEEDING TO  
PIGS IN THE MID TO LATE  
NURSERY PHASE

Masterfeeds Vigor Starter 4 is a highly digestible and palatable starter ration designed to ensure continued and fast efficient growth

## WHO USES:

A producer who wants a palatable diet for optimal growth and efficiency in the nursery.

## FEEDING DIRECTIONS:

Masterfeeds Vigor Starter 4 is a highly digestible and palatable starter ration designed to ensure continued and fast efficient growth. It is ideal as a starter for pigs weighing from 12 kg to 25 kg body weight. It can be fed following Vigor Starter 3 in a multi-phase starter program. Typical usage is approximately 20 kg per pig.

## FEATURES & BENEFITS:

**Strategic enzyme combination.** Improves digestibility and nutrient absorption for better growth and efficiency.

**Direct-fed microbial.** Intended to promote the growth of beneficial intestinal micro flora and improve ingredient digestibility and aid in improving gut health and function.

**Comprehensive vitamin and organic mineral package.** Aids in promoting healthy vigorous piglets for maximum growth potential.

**Acidified.** Improves digestibility and promotes optimal growth.

## FEEDING TIPS:

1. A proper environment is critical to ensure good health and performance throughout the nursery phase. Follow proper stocking density, temperature, humidity and ventilation guidelines for managing nursery pigs. Keep feed fresh and ensure there is an adequate supply of clean fresh drinking water.
2. Feed Masterfeeds Vigor Starter 4 according to the feed budget developed for your individual needs/goals. Vigor Pig Starter 4 is suitable to be fed from 12.5 kg to 25 kg in a multi-phase starter program.

# VIGOR™ STARTER 5

FOR FEEDING TO  
PIGS IN THE LATE  
NURSERY PHASE

COMMERCIAL STARTER

Masterfeeds Vigor Starter 5 is a digestible and palatable starter ration designed to ensure continued and fast efficient growth

## WHO USES:

A producer who wants a palatable diet for optimal growth and efficiency in the nursery.

## FEEDING DIRECTIONS:

Masterfeeds Vigor Starter 5 is a highly digestible and palatable starter ration designed to ensure continued and fast efficient growth. It is ideal as a starter for pigs weighing from 15 kg to 30 kg body weight. It can be fed following Vigor Starter 4 in a multi-phase starter program. Typical usage is approximately 27 kg per pig.

## FEATURES & BENEFITS:

**Strategic enzyme combination.** Improves digestibility and nutrient absorption for better growth and efficiency.

**Comprehensive vitamin and organic mineral package.** Aids in promoting healthy vigorous piglets for maximum growth potential.

## FEEDING TIPS:

1. A proper environment is critical to ensure good health and performance throughout the nursery phase. Follow proper stocking density, temperature, humidity and ventilation guidelines for managing nursery pigs. Keep feed fresh and ensure there is an adequate supply of clean fresh drinking water.
2. Feed Masterfeeds Vigor Starter 5 according to the feed budget developed for your individual needs/goals. Vigor Pig Starter 5 is suitable to be fed from 15 kg to 30 kg in a multi-phase starter program.

# VIGOR™ 19% PIG STARTER AT

FOR FEEDING TO  
PIGS TRANSITIONING  
FROM COMPLEX DIETS

PIG STARTER

Masterfeeds Vigor 19% Pig Starter AT provides a blend of digestible and palatable ingredients to ensure fast efficient growth.

## WHO USES:

A producer who wants a palatable diet for good growth and efficiency in the nursery.

## FEEDING DIRECTIONS:

Masterfeeds Vigor 19% Pig Starter AT provides a blend of digestible and palatable ingredients for fast efficient growth. It is ideal as a starter for pigs weighing from 10 kg to 25 kg.

## FEEDING TIPS:

*A proper environment is critical to ensure good health and performance throughout the nursery phase. Follow proper stocking density, temperature, humidity and ventilation guidelines for managing nursery pigs. Keep feed fresh and ensure there is an adequate supply of clean fresh drinking water.*

## FEATURES & BENEFITS:

**Strategic enzyme combination.** Improves digestibility of vegetable based protein and nutrient absorption for better growth and efficiency.

**Direct-fed microbial.** Intended to promote the growth of beneficial intestinal micro flora and improve ingredient digestibility and aid in improving gut health and function.

**Comprehensive vitamin and organic mineral package.** Aids in promoting healthy vigorous piglets for maximum growth potential.

**Contains a progressive blend of fatty acids,** prebiotic components and readily available mineral forms that drive feed intake while promoting better intestinal health, leading to better performance.

**Contains Actigen®.** To maintain gut health and stimulate immune function which helps maximize performance.

**Contains Villigen®.** For development and growth of villi that enhances nutrient absorption and growth.

## GUARANTEED ANALYSIS
