PERFORMANCE FEED

12.5% EXACTOR LITE (TEXTURIZED)

FOR HORSES IN INTENSE TRAINING

Masterfeeds 12.5% Exactor Lite is our gold standard ration for the race horse and the needs of the high performance trainer looking for a very palatable, no corn, fiber added, texturized feed. Very popular with thoroughbred trainers and well liked across the industry for hard working horses that are fussy eaters and horses with sensitive digestive tracts. This feed is oat and barley based with a supplement pellet containing our premium vitamin mineral pack. It is blended with shredded beet pulp and rich with molasses.

FEEDING DIRECTIONS:

Feed 1½ lbs per 100 lbs of body weight along with good quality hay. To promote good gut health provide a minimum of 2 lbs for every 220 lbs of body weight of hay spread over multiple feedings throughout the day.

FEEDING TIPS:

For the mature working horse: feed as a sole ration at 2 lbs per 100 lbs of body weight per day will maintain a horse in good condition under light exercise. The working and growing horse will require more feed, up to 2 lbs per 100 lbs of body weight per day.

FEATURES & BENEFITS:

Contains added fat from vegetable oil. Increases energy density to elevate calorie intake for the same amount of ration. Increases muscle glycogen content, over time (10 to 12 weeks).

No corn included. Reduces the risk of rapid acid production in large intestine that may cause colic, ulcers, founder and/or diarrhea when adjusting to a higher, total grain intake.

Contains shredded beet pulp. Increased energy and Crude fiber bulk to support intense physical activity and digestive health.

Contains 100% organic trace minerals. For increased bio-availability of those nutrients essential for immune response, hoof health, bone and cartilage development.

Contains Yea-Sacc® 1026 and Pulse 500.

Together, these products work as both a pre-biotic; feeding existing bacteria and a pro-biotic; adding more beneficial bugs to the gut. This works to stabilize the gut, reduces digestive upsets, and maximizes nutrient digestion and absorption.

Contains high levels of Vitamin E.

A powerful antioxidant to enhance immune response and improve tissue regeneration after strenuous exercise.

Contains 35 mg/lb Copper. Involved in RBC hemoglobin formation, Iron mobilization and bone development. Important for many bodily functions.

Designed for feeding with hay. Advanced nutrition to balance hay feeding for genetically superior performance horses in training.

This feed contains added Selenium at 0.5 ppm.

GUARANTEED ANALYSIS

Crude Protein (minimum)	12.5%
Crude Fat (minimum)	6.0%
Crude Fiber (maximum)	12.0%
